YENTLY · BUSINESS SYSTEMS

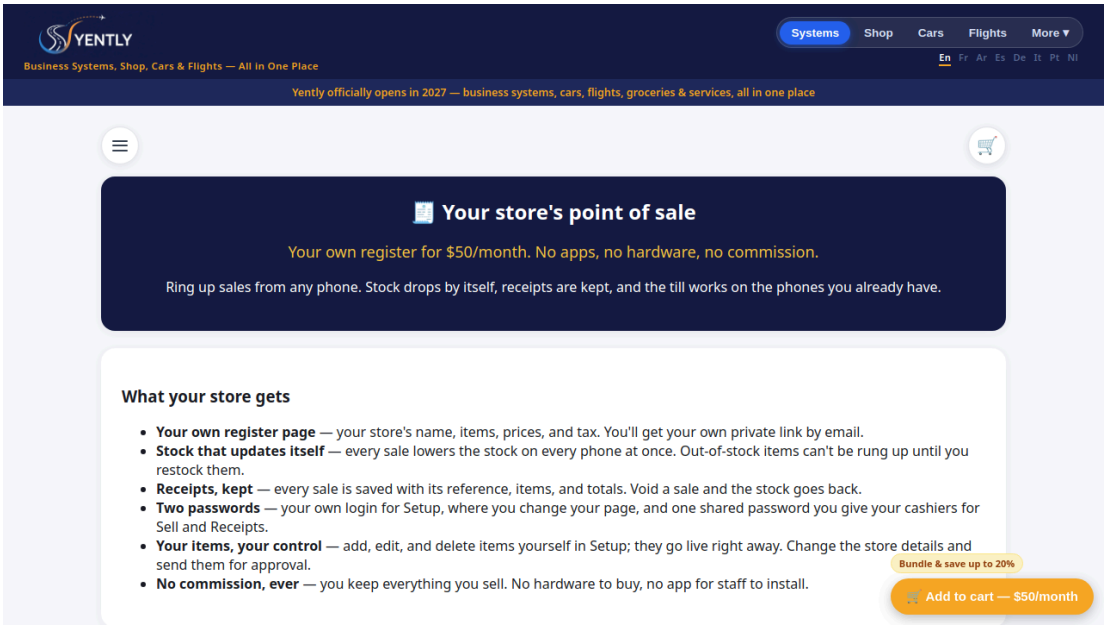

Your POS System
A Step-by-Step Guide

From buying it to ringing up your first sale.

Yently — Everything you need, gently in one place.

November 2026 · For store owners

This guide walks you through your POS System from start to finish: how to buy it, how to set up your store and your items, how to ring up a sale, and how receipts work. Every step shows you exactly where to click.

Your POS page. This is the page your customers see the offer on — and the page you buy it from. The gold button at the bottom right adds it to your cart.

> **Keep this guide with your setup email** — the email has your private link, your Setup login and your cashier password. You will need all three below.

1. What you get

Your POS System is your own register on the web, built and hosted by Yently. It has three parts:

- **Your own register page** — your store's name, items, prices and tax, on your own private link.
- **Stock that updates itself** — every sale lowers the stock on every phone at once. An item that runs out can't be rung up until you restock it.
- **Receipts, kept** — every sale is saved with its reference, items and totals, so you can look any sale up later.

No app to install, no hardware to buy. It works on the phones you already have, at the counter or anywhere in the shop.

Your store, your control. You add your items, prices and stock yourself in Setup — items go live right away. And the POS page has a short video that shows these same steps on screen, if you would rather watch than read.

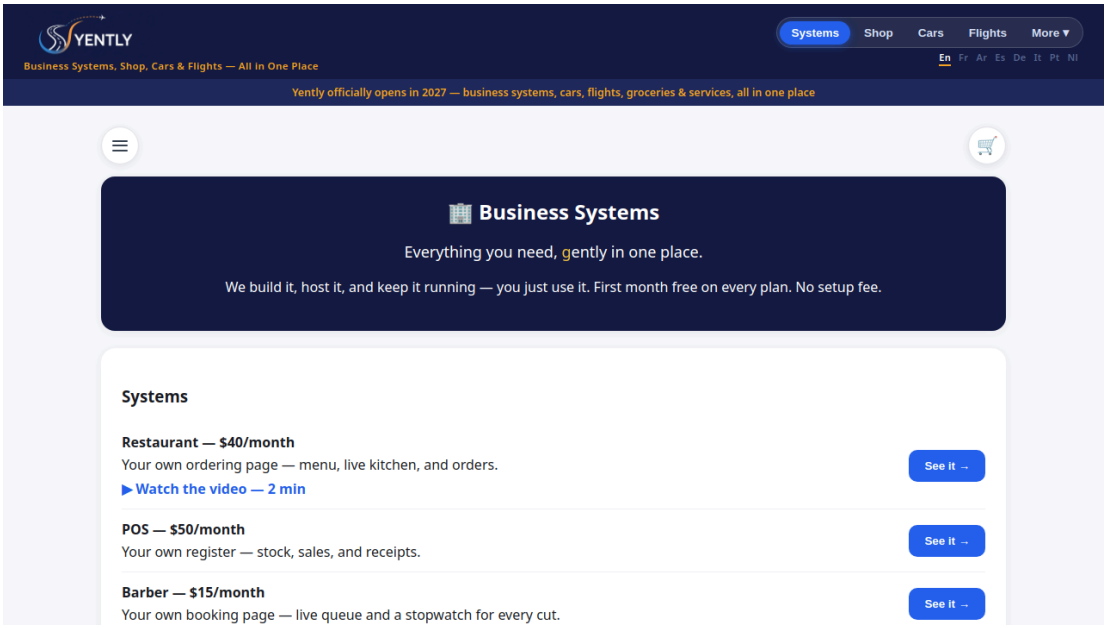

$50/month First month free. No setup fee. No commission on your sales, ever.

2. How to buy it

Buying takes three clicks. There is no payment to make on the page today, and your first month is free.

Step 1. Find the POS system — Open yently.com and tap **Systems** in the top menu. POS is the second row — $50/month. Tap the blue “See it” button on the right of that row.

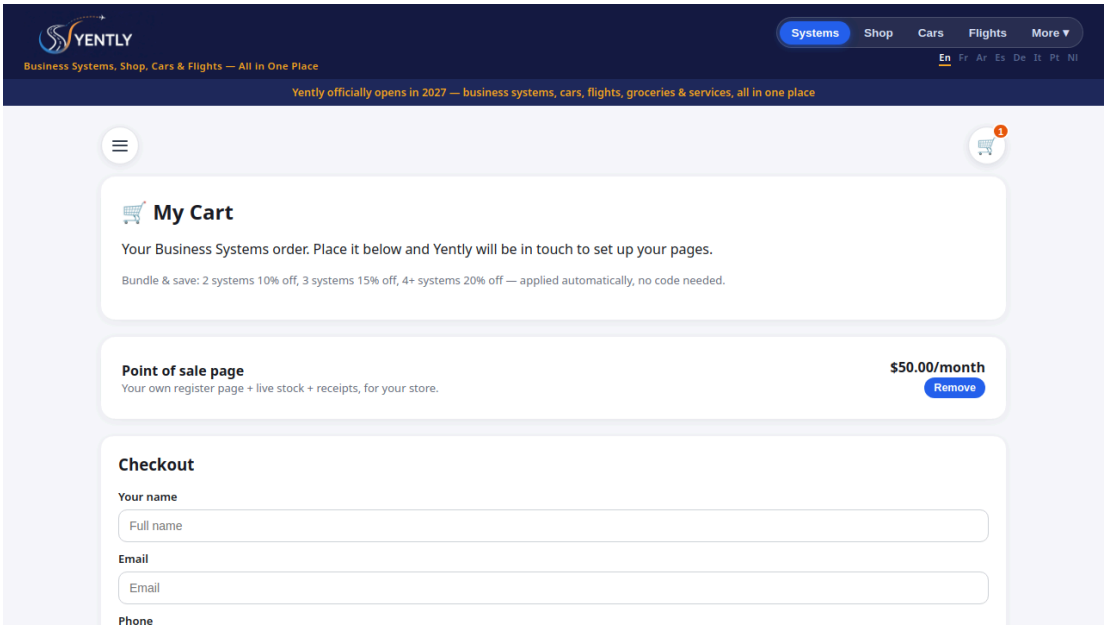

Step 2. Add it to your cart — On the POS page, tap the gold “Add to cart — $50/month” button at the bottom right. (If it already says “In your cart”, it is already in.)

The Systems hub. POS is the second row, at $50/month.

Step 3. Check out — Tap “Go to My Cart” — or the cart icon at the top right. Fill in the checkout form: **Full name**, **Email** and **Phone**. **Note** (optional) — your store name and city help Yently set your page up. Check the total: List total: $50.00/month and Total: $50.00/month. Then tap the blue “Place order” button.

Step 4. Yently sets it up — There is nothing to install and nothing to build. Yently sets your page up and emails you your own private link, your Setup username and password, and the cashier password for your staff.

My Cart checkout. Your details, then “Place order”.

3. Your first login

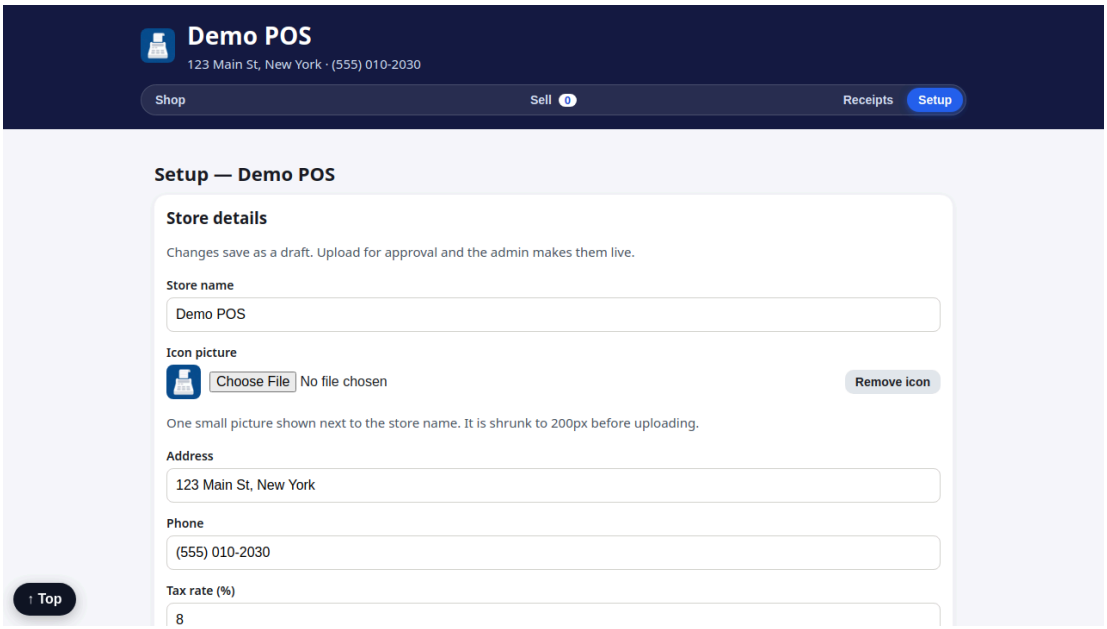

Open your private link from the email. The page has four tabs at the top: **Shop**, **Sell**, **Receipts**, **Setup**. Tap **Setup** and log in with the username and password from your email (the “Setup sign-in” boxes: Username and Password).

Two passwords. Your own Setup login is for you alone. The cashier password is one shared password your staff use for Sell and Receipts — see section 9.

4. Set up your store

Tap the **Setup** tab. At the top is **Store details**: your store name, an icon picture, address, phone and tax rate. The demo store uses a tax rate of 8%.

Two kinds of change. Items you add or change go live right away. Changes to your store details save as a draft — tap “Upload for approval” and Yently approves them, then they go live. Your customers keep seeing the approved page until then.

The Setup tab. Your store details at the top, with the draft note above them. The items section sits below, on the same tab.

5. Add your items

In Setup, below the store details, is your items list. For each item: its name, price, category, barcode and starting stock. The demo store shows how it looks: Bottled Water $2.00, Coffee $3.00, Orange Juice $4.00, Tea $2.50 — each with its stock beside it.

Barcodes. Type the barcode in when you add an item, or scan it with your phone camera in Sell (see section 7). A scan adds the matching item straight to the sale.

You can add, edit and delete items yourself, any time. They go live the moment you save them — no approval wait.

6. Your shop page — what your customers see

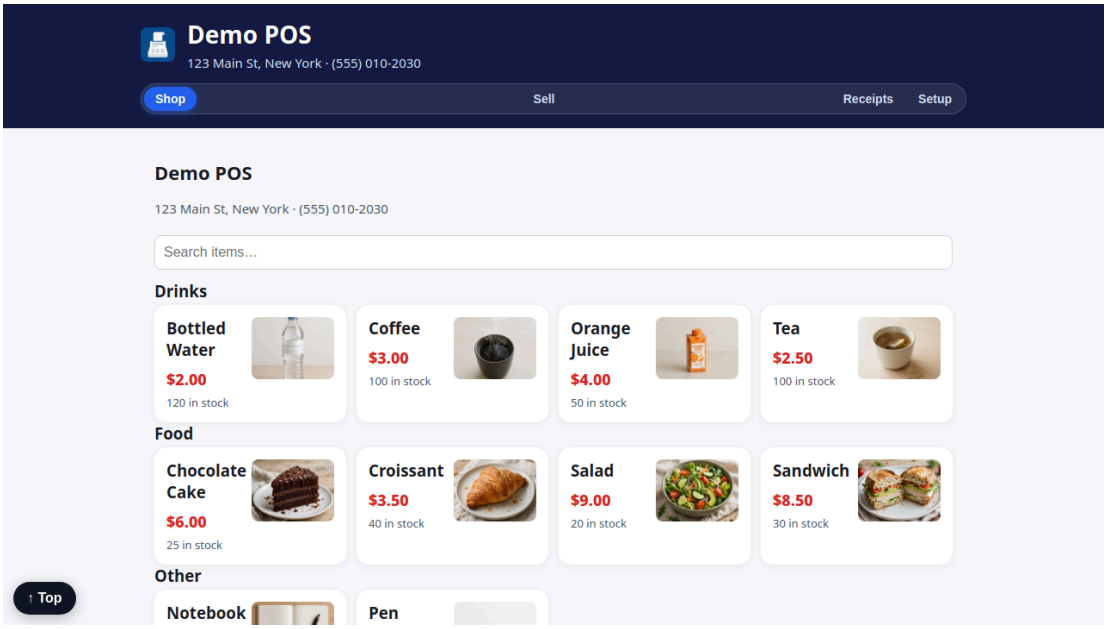

Your store name, address and phone sit at the top of the page. Below them: a search box, and your items grouped by category, each with a photo, its price and how many are in stock — “120 in stock”.

Customers can look but not sell. Selling happens on the Sell tab, and that needs the cashier password.

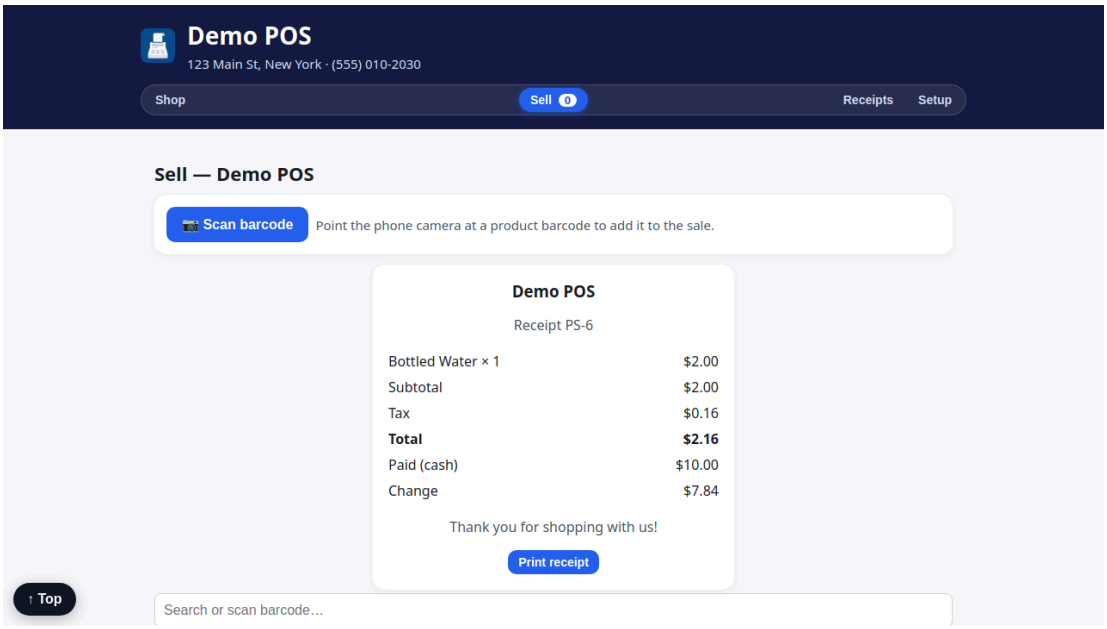

7. Ringing up a sale

Tap the **Sell** tab and unlock it with the cashier password. Then tap **Add** on an item — or tap **“Scan barcode”** and point the phone camera at the product’s barcode. Enter the cash the customer hands you: it must cover the total. The till works the total out, including tax at the rate you set in Setup (the demo uses 8%).

The sale is done: the receipt is saved, and the stock drops on every phone at once.

The Shop tab. Items by category, with a photo, price and stock for each one.

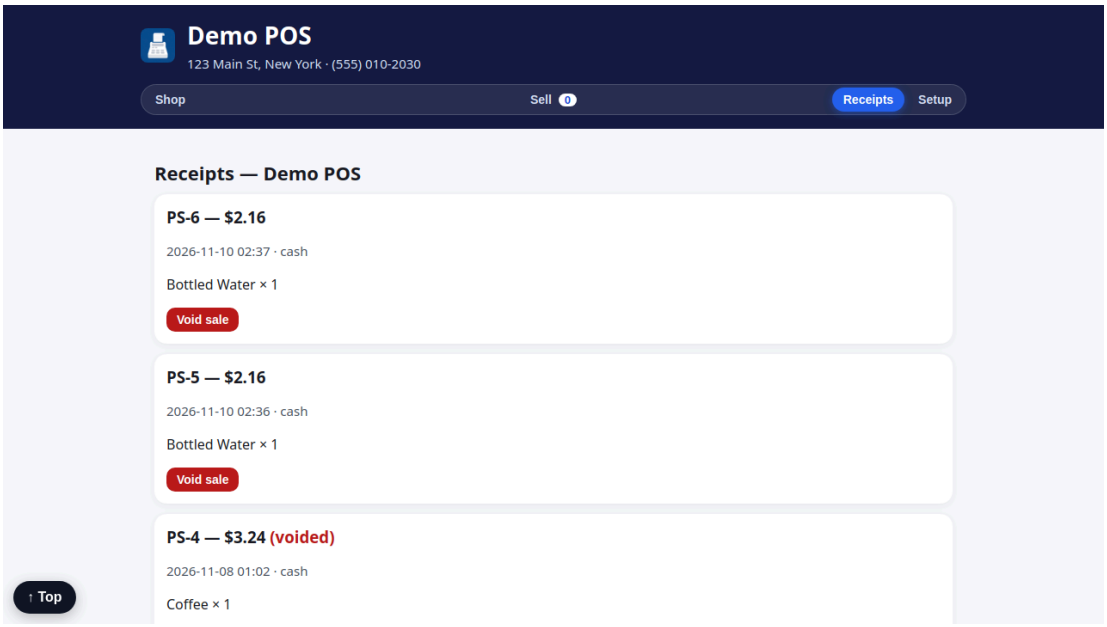

A finished sale. Bottled Water, $2.00, tax $0.16, total $2.16 — paid $10.00 in cash, $7.84 change. Tap “Print receipt” for a paper copy.

8. Receipts

Tap the **Receipts** tab. Every sale is listed with its reference (PS-6, PS-5…), its total, the date and time, and how it was paid.

Made a mistake? Tap the red **“Void sale”** button on that sale. The sale is marked **(voided)** and the stock it used goes straight back.

Receipts. Every sale with its reference and total. The red “Void sale” button undoes a mistake — and puts the stock back.

9. The cashier password

One shared password unlocks **Sell** and **Receipts**. Every cashier uses the same one, on any phone. The password is set by Yently and comes with your setup email. If you want it changed, ask Yently and they will change it for you.

10. Add-ons — make it yours for a little more

Clean Link, $2/month — your own short link, yently.com/your-store, instead of the longer page address. **TV Gallery, $2/month** — your offers playing on a TV screen in your shop. **Live Chat, $3/month** — a chat bubble on your page so visitors can ask questions.

Add any of them the same way — from its own page, Add to cart — and the bundle saving in section 11 applies to them too.

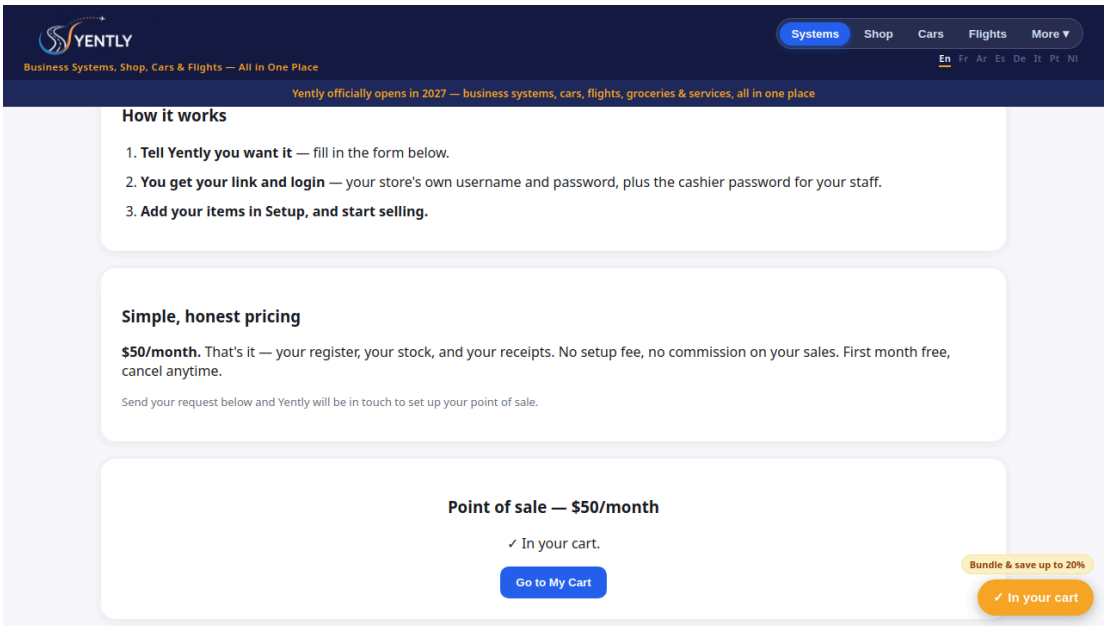

11. Prices at a glance

Plan	Price	First month
POS system	$50/month	Free
Clean Link	$2/month	Free
TV Gallery	$2/month	Free
Live Chat	$3/month	Free

Bundle: 2 plans 10% off, 3 plans 15% off, 4 or more plans 20% off — applied automatically. No setup fee. No commission on your sales, ever.

12. Why Yently

Other till systems charge $60, $100, $200 a month — and still take a cut of every sale. Yently is $50, first month free, no commission, no setup fee, cancel anytime. Your register, your stock, your receipts, your customers.

How it works, in three steps — and simple, honest pricing.

13. Need help?

Use the request form on the POS page: fill in your name, store name, email and phone, write your question in the message box, and tap “Send request”. Yently will be in touch to set up your point of sale.

Your first sale, in short: buy it on yently.com → get your link and login by email → log in to Setup → add your items → ring up a sale on the Sell tab.
