YENTLY · YENTLY KIDS

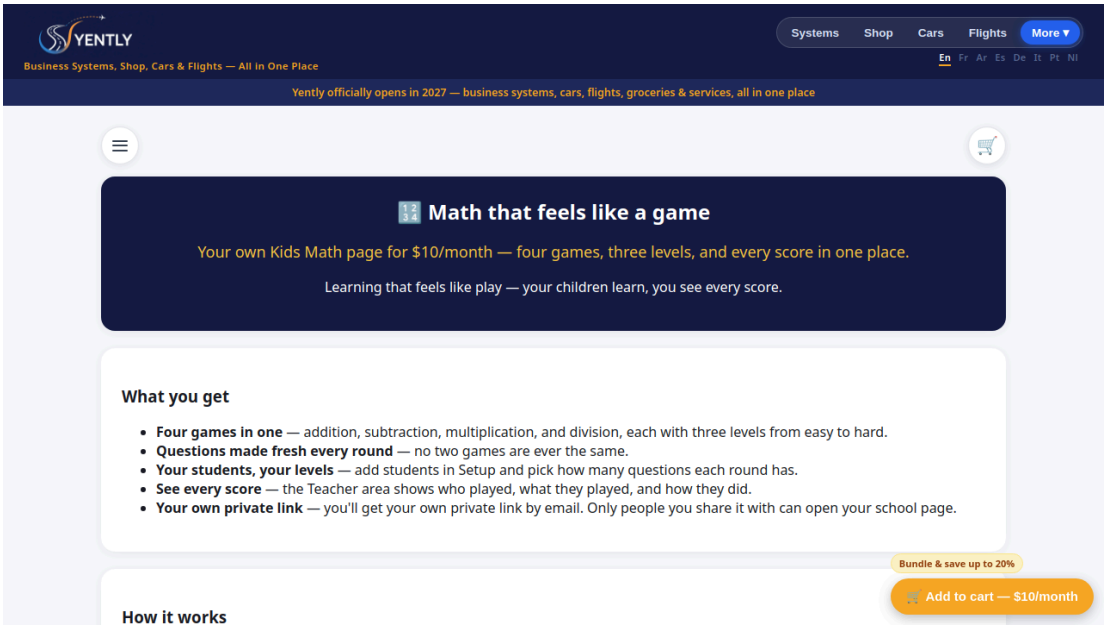

Your Kids Math Page
A Step-by-Step Guide

From buying it to your child’s first game.

Yently — Everything you need, gently in one place.

November 2026 · For parents and teachers

This guide walks you through your Kids Math page from start to finish: how to buy it, how to set up your school and your students, how children play, and how the Teacher area shows every score. Every step shows you exactly where to click.

Your Kids Math page. “Math that feels like a game” — your own page for $10/month, with four games, three levels, and every score in one place. The gold button at the bottom right adds it to your cart.

Keep this guide with your setup email. It covers everything from the first click to the first game, in the order you will do it.

1. What you get

Your Kids Math page is your own maths practice page on the web, built and hosted by Yently. It has three parts:

- **The Play area** — four games in one: addition, subtraction, multiplication and division, each with three levels from easy to hard. The questions are made fresh every round, so no two games are ever the same.
- **The Teacher area** — every score in one place: who played, what they played, and how they did.
- **Setup** — your school's control panel: the school name, about text, your students, and how many questions each round has.

Children play on the page itself — no login for them, just their name. There is no app to install. It opens in the browser on any phone, tablet or computer, and works on a big screen in the classroom too.

Want to see it first? Tap "Interested in a demo?" on the page and Yently will send you the demo link. Its students are Alex, Sara and Omar.

$10/month First month free. No setup fee. Cancel any time.

2. How to buy it

Buying takes three clicks. There is no payment to make on the page today, and your first month is free.

Step 1. Find the Math page

Open **yently.com** and tap **More** in the top menu, then **Yently Kids**. Math is the first row — $10/month, “Four games — adding, taking away, multiplying, and dividing — by level.” Tap the blue **“See it”** button on the right of that row.

Step 2. Add it to your cart

On the Math page, tap the gold **“Add to cart — $10/month”** button at the bottom right of the screen. A “Bundle & save up to 20%” label sits just above it.

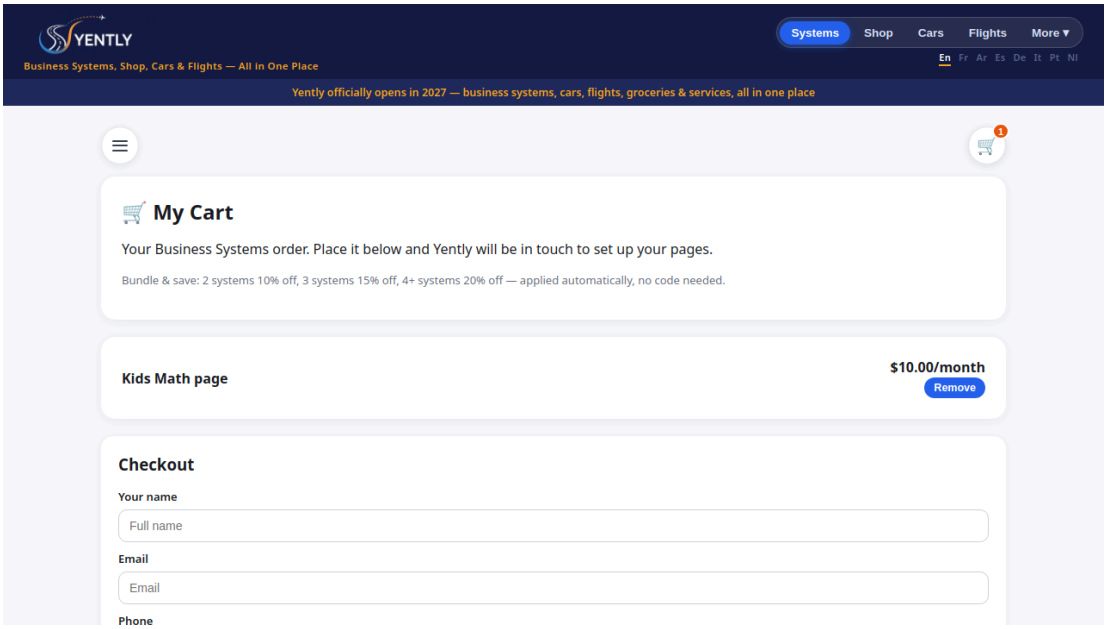

There is a second way in, on the same page: fill in the **“Get your Kids Math page”** form lower down (your name, school name if you like, email and phone, and a few words about your class) and tap **“Send request”**. Yently will be in touch to set your Kids Math page up.

Step 3. Check out

Tap **“Go to My Cart”** — or the cart icon at the top right. Fill in the checkout form:

- **Full name**, **Email** and **Phone**.
- **Note (optional)** — your school name and anything that helps Yently set your page up.

Check the total: **List total: $10.00/month** and **Total: $10.00/month**. Then tap the blue **“Place order”** button.

My Cart checkout. Your Kids Math page at $10.00/month, and the checkout form with your details. No card details are asked for.

Step 4. What happens next

Your order goes to Yently. There is no payment to make on the page today. Yently sets your school up and emails you **your own private link**, plus **your own username and password**, and the **teacher login**. Nothing to install, nothing to build.

3. Your first login

Open your private link from the email. The page has **three tabs** at the top: **Play, Teacher, Setup**.

Tap **Setup** and log in with the username and password from your email (the “Setup sign-in” boxes: Username and Password).

> **Two passwords.** Your own Setup login is for you alone. The **teacher password** is one shared password for the Teacher area, for anyone who needs to see the scores. Keep your Setup login to yourself.

If the link does not point to a school, the page says “School not found”. Check the link and try again — or ask Yently for your school link.

4. Set up your school

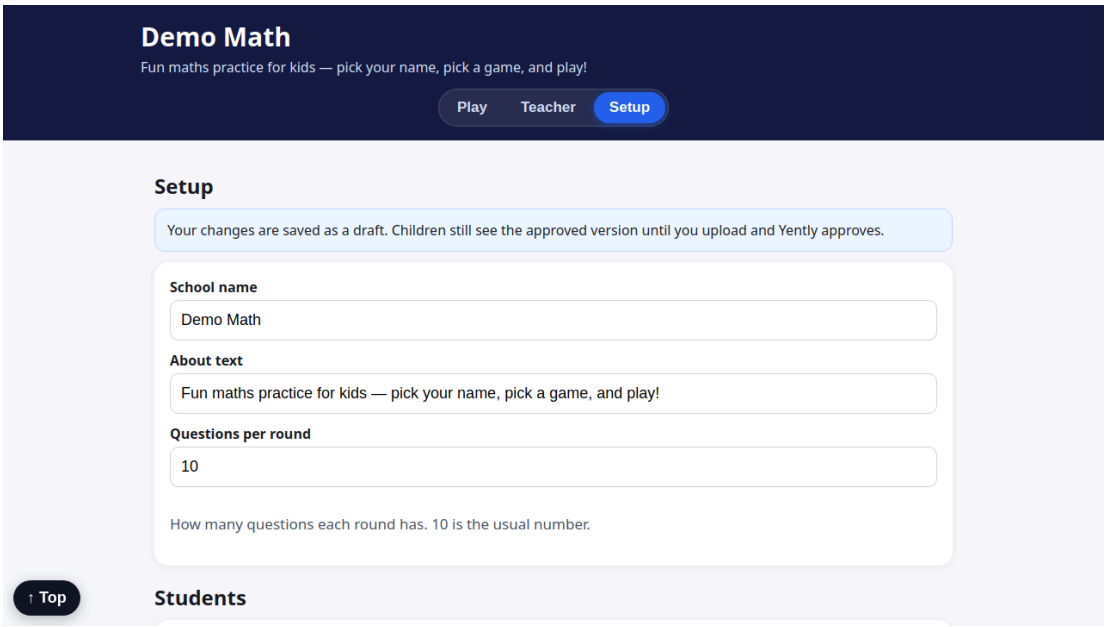

After you log in to the Setup tab, you will see a note at the top:

> “Your changes are saved as a draft. Children still see the approved version until you upload and Yently approves.”

That means you can change things safely. Nothing goes live until you say so and Yently approves it.

Fill in these fields:

- **School name** — the name shown at the top of your page.
- **About text** — a short line about your school, shown under the name. The demo school says “Fun maths practice for kids — pick your name, pick a game, and play!”
- **Questions per round** — how many questions each round has. 10 is the usual number; you can pick from 1 to 50.

The Setup tab. Your school name, about text and questions per round, with the draft note above them. The Students section sits below, on the same tab.

When you are done, tap **“Save draft”**. Your changes are saved as a draft — children still see the approved version. When you are happy with everything, tap **“Upload for approval”**. Yently approves it and your changes go live. You will get a confirmation once they are live.

5. Add your students

In the Setup tab, under **Students**, you will see: “Children pick their name from this list before they play. Add one name at a time.”

- Type a name in the **“New student name”** box and tap **“+ Add student”**.
- To take a name off the list, tap **“Remove”** next to it.
- Add as many children as you like — there is no limit on the list.

If no students have been added yet, the Play tab says: “No students have been added yet. The teacher can add names in Setup.”

When the list is done, tap **“Save draft”**, then **“Upload for approval”**, the same as in section 4. Your new students appear on the Play tab once Yently approves.

6. How children play

Playing needs no login. A child opens your school link and the Play tab is already there. It works in three picks:

Pick 1. Who is playing?

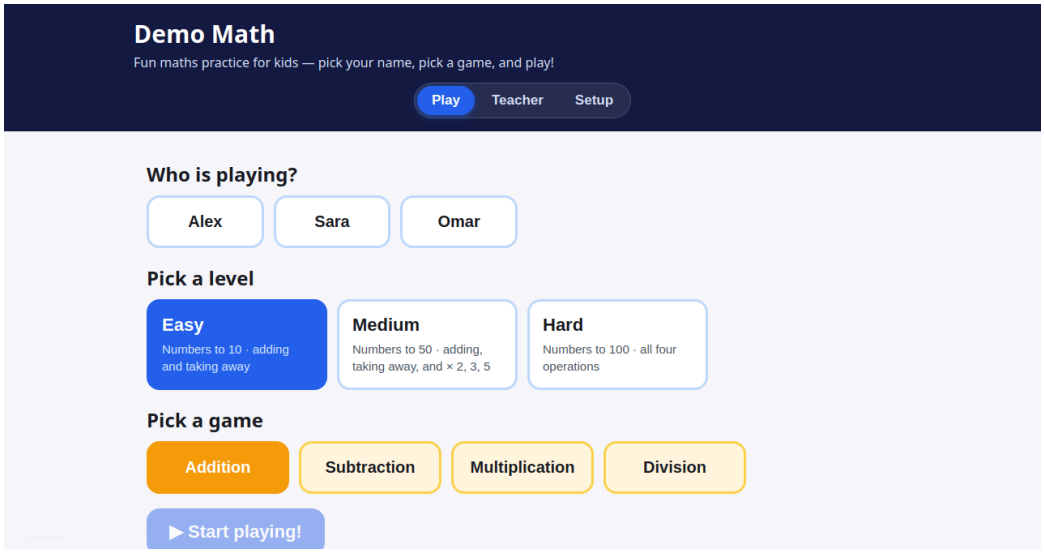

Tap your name from the student list. The page remembers the last child who played on that device, so they do not have to find their name every time.

Pick 2. Pick a level

- **Easy** — numbers to 10, adding and taking away.
- **Medium** — numbers to 50, adding, taking away, and multiplying by 2, 3 and 5.
- **Hard** — numbers to 100, all four operations.

Pick 3. Pick a game

Addition, Subtraction, Multiplication or **Division**. Then tap **“Start playing!”** — it stays greyed out until a name is picked.

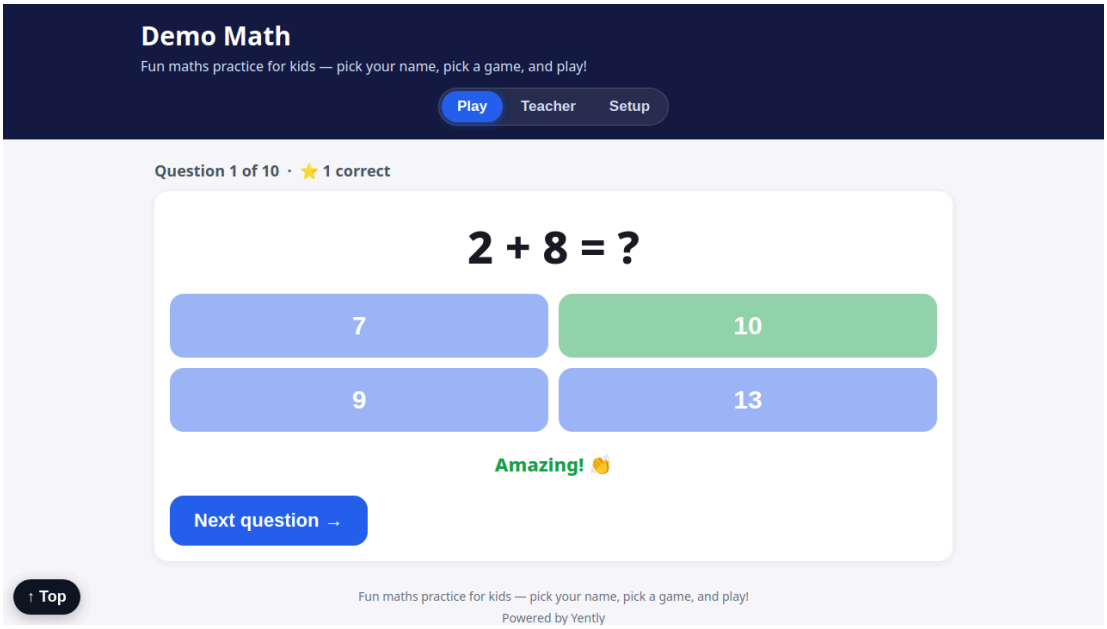

The Play tab. Alex, Sara and Omar in the demo school; Easy picked; Addition picked. Tap “Start playing!” to begin.

6. How children play (continued)

Each round is a set of questions — 10, if you left the usual number in Setup. The top of the screen shows “Question 1 of 10” and how many are right so far.

- One question appears, with **four answers** to pick from. Tap one.
- A right answer turns **green** and gets a cheer — “Great job!”, “Amazing!”, “Brilliant!” and more.
- A wrong answer shows the right one: “Not quite — the answer was 10. You will get the next one!”
- Tap **“Next question”** to carry on. Division always has a whole-number answer, and subtraction never goes below zero.

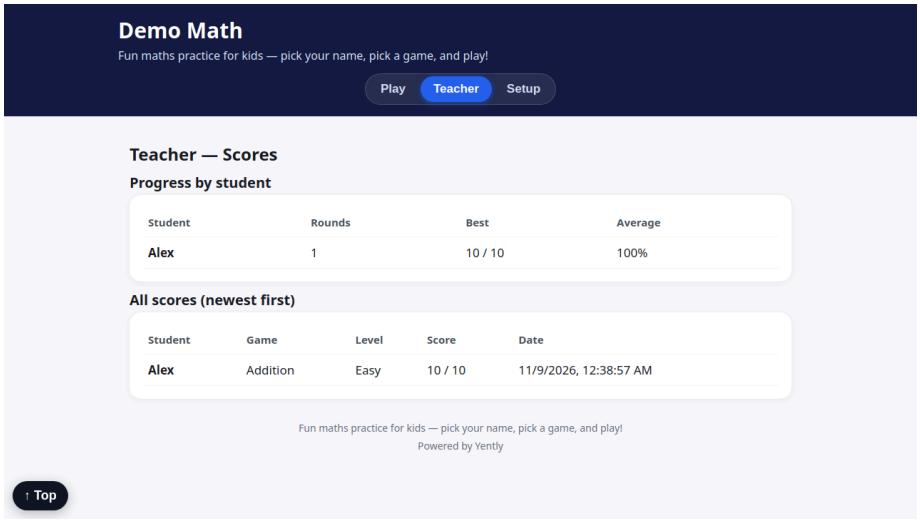

A question in progress. “2 + 8 = ?” — 10 is green because it is the right answer, and the cheer says “Amazing!”. Tap “Next question” to carry on.

At the end of the round, the score screen shows the result — for example “Alex, you scored 10 / 10” — with a message to match how they did, and two buttons: **“Play again”** for a fresh round, or **“Change game”** to pick a different game or level. The score is saved at once: “Your score was saved for your teacher to see.”

7. The Teacher area — every score

Tap the **“Teacher”** tab, enter the teacher password and tap **“Unlock”**. Two tables appear:

- **Progress by student** — for each child: how many rounds they played, their best score, and their average. At a glance you can see who is flying and who needs a little more practice.
- **All scores, newest first** — every round: student, game, level, score, and date.

The Teacher tab. Progress by student at the top — Alex played 1 round, best 10 / 10, average 100% — and every score below, newest first.
If nobody has played yet, the Teacher area says: “No scores yet. Once children play a round, their scores will show up here.”

8. The teacher password

One shared password unlocks the **Teacher area**. Every parent or teacher who needs the scores uses the same one, on any phone.

The password is **set by Yently** and comes with your setup email. There is no place in Setup to change it yourself — if you want it changed, ask Yently and they will change it for you.

The password is never saved on the phone. If the page is reloaded, it asks again. Tell the people who need the scores the password, and ask Yently to change it if someone should no longer see them.

If your school has no teacher password set, the Teacher area stays open and anyone can see the scores. Yently sets a password for you, so this does not happen by accident.

9. Add-ons — more subjects, more for a little more

Math is one of nine Yently Kids subjects. The others work the same way:

- **More subjects — $10/month each:** English, Arabic, French, Spanish, Science, Geography, Coding and Reading. All nine together are $90/month, or **$72/month** with the 20% bundle saving.
- **Clean Link — $2/month.** Your own short link, yently.com/your-name, instead of the long one.
- **TV Gallery — $2/month.** Your pictures on the big screen — a slideshow for the classroom TV.
- **Live Chat — $3/month.** Chat with visitors right on your page.

> **Bundle & save:** 2 plans 10% off, 3 plans 15% off, 4 or more plans 20% off, applied automatically. Kids subjects count like any plan.

10. Prices at a glance

Plan	Price	First month
Kids Math page	$10/month	Free
Each extra subject	$10/month	Free
Clean Link	$2/month	Free
TV Gallery	$2/month	Free
Live Chat	$3/month	Free

Bundle: 2 plans 10% off, 3 plans 15% off, 4 or more plans 20% off — applied automatically. No setup fee.

11. Why Yently

Your Kids Math page is **$10 a month**, first month free, no setup fee.

Yently builds it, hosts it, and keeps it running. Add another subject or an add-on any time, for a few dollars a month. Cancel any time.

12. Need help?

Use the **“Get your Kids Math page”** form on the Math page: fill in your name, school name if you like, email and phone, write about your class in the message box, and tap **“Send request”**. Yently will be in touch to set up your Kids Math page.

> **Your first game, in short:** buy it on yently.com → get your link and logins by email → log in to Setup → add your students → upload for approval → share the link, the children play, and every score appears in the Teacher area.

Thank you for choosing Yently. Your Kids Math page is ready when you are — and Yently is one message away if you need a hand.
