YENTLY · YENTLY KIDS

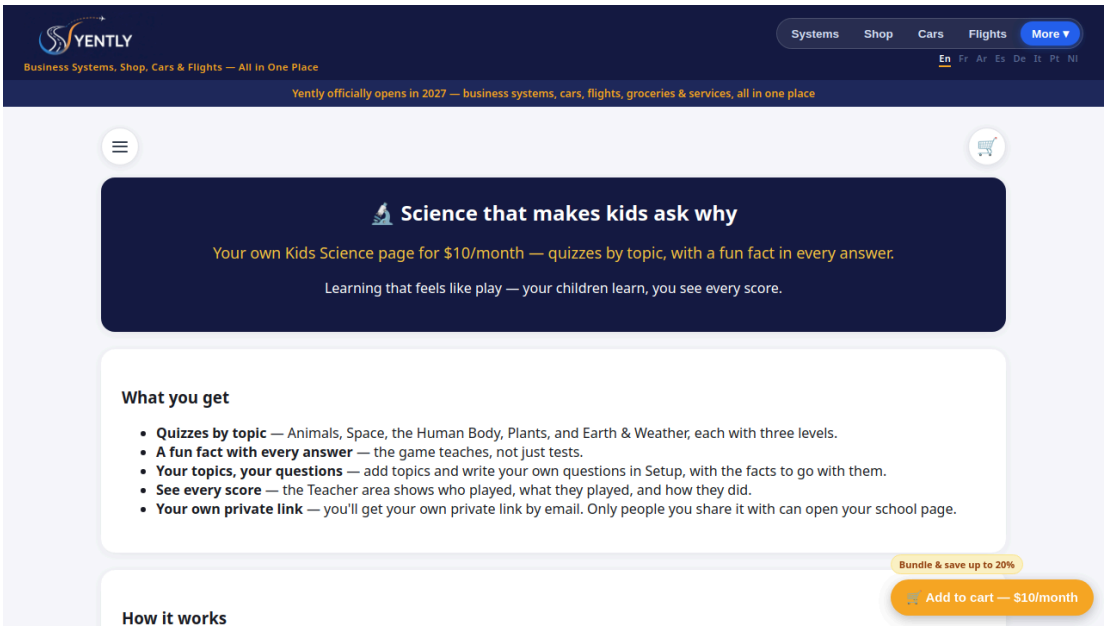

Your Kids Science Page
A Step-by-Step Guide

From buying it to your child’s first quiz.

Yently — Everything you need, gently in one place.

November 2026 · For parents and teachers

This guide walks you through your Kids Science page from start to finish: how to buy it, how to set up your school, your students and your questions, how the children play the quizzes, and how the Teacher area shows every score. Every step shows you exactly where to click.

Your Kids Science page. This is the page parents see the offer on — and the page you buy it from. The gold button at the bottom right adds it to your cart.

Keep this guide with your setup email. It covers everything from the first click to the first quiz, in the order you will do it.

1. What you get

Your Kids Science page is your own science school on the web, built and hosted by Yently. It has three parts:

- **Your own school page** — your school's name, about text, students and quizzes, on your own private link.
- **Play, for the children** — a child picks their name, a topic and a level, then answers 5 quiz questions. Every answer comes with a fun fact, so the game teaches, not just tests.
- **The Teacher area, for you** — every score in one table: who played, what they played, and how they did.

The quizzes cover five topics: **Animals, Space, the Human Body, Plants, and Earth & Weather**, each with three levels — **Easy, Medium and Hard**. You can add your own topics and write your own questions too, with the facts to go with them.

There is no app to install and nothing to download. It works on the phones and computers you already have, in the browser. The children play — and you see every score.

$10/month First month free. No setup fee. Cancel anytime.

2. How to buy it

Buying takes three clicks. There is no payment to make on the page today, and your first month is free.

Step 1. Find the Science page

Open **yently.com** and tap **More** in the top menu, then **Yently Kids**. Science is one of the nine subjects — $10/month. Tap the blue **“See it”** button on the right of the Science row.

Step 2. Add it to your cart

On the Science page, tap the gold **“Add to cart — $10/month”** button at the bottom right of the screen.

There is a second way in, on the same page: fill in the **“Get your Kids Science page”** form lower down (your name, school name, email and phone) and tap **“Send request”**. Yently will be in touch to set up your Kids Science page.

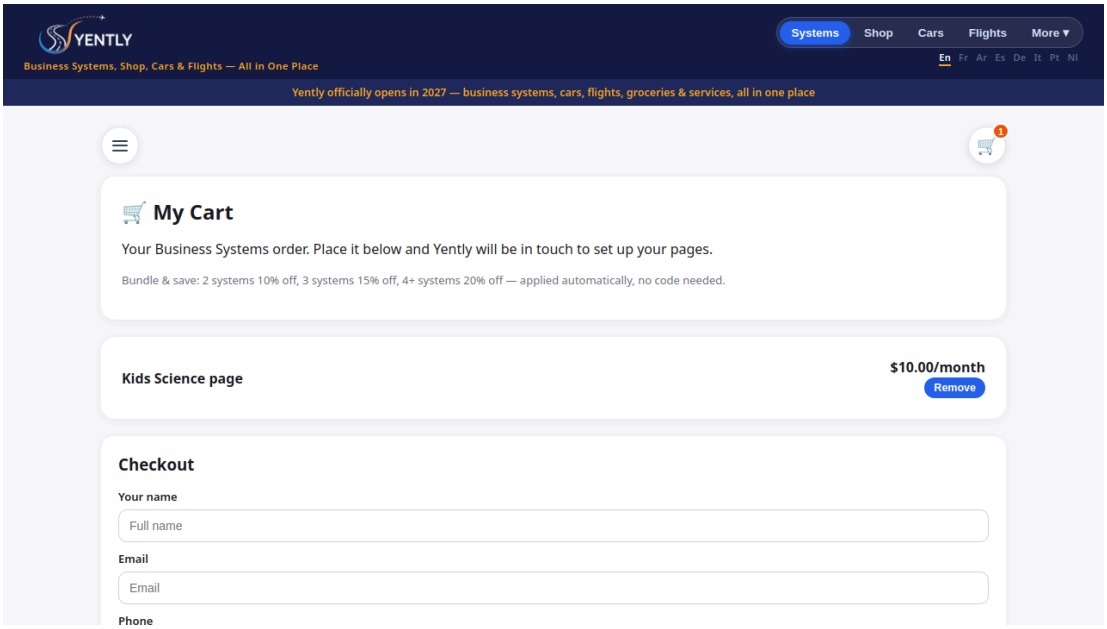

> **Want to see it working first?** The demo school shows the real page in action — tap “Interested in a demo?” on the Science page and Yently will send you the demo link.

Step 3. Check out

Tap **“Go to My Cart”** — or the cart icon at the top right. Fill in the checkout form:

- **Full name**, **Email** and **Phone**.
- **Note (optional)** — your school name and city help Yently set your page up.

Check the total: **List total: $10.00/month** and **Total: $10.00/month**. Then tap the blue **“Place order”** button.

My Cart checkout. Your Kids Science page at $10.00/month, and the checkout form with your name, email and phone. No card details are asked for.

Step 4. What happens next

Your order goes to Yently. There is no payment to make on the page today. Yently sets your school up and emails you **your own private link**, plus **your own username and password** and the **teacher password**. Nothing to install, nothing to build.

3. Your first login

Open your private link from the email. The page has **three tabs** at the top: **Play, Teacher, Setup**.

Tap **Setup** and log in with the username and password from your email (the “Setup sign-in” boxes: Username and Password).

> **Two passwords.** Your own Setup login is for you alone. The **teacher password** is one shared password for the Teacher area. Keep your Setup login to yourself.

4. Set up your school

After you log in to the Setup tab, you will see a note at the top:

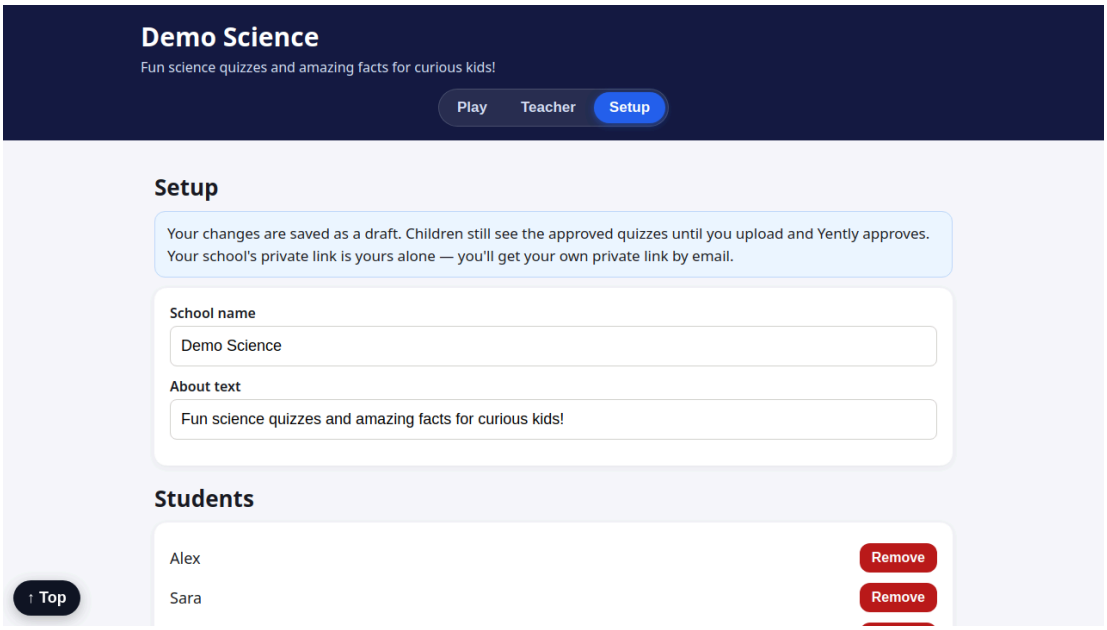

> “Your changes are saved as a draft. Children still see the approved quizzes until you upload and Yently approves.”

That means you can change things safely. Nothing goes live until you say so and Yently approves it.

Fill in these fields:

- **School name** — the name shown at the top of your page.
- **About text** — a short line about your school, shown under the name.

Then add your students. Under **Students**, type a name in the “New student name” box and tap **“+ Add student”**. To take a student off the list, tap **“Remove”** next to their name.

The Setup tab. Your school name and about text at the top, with the draft note above them. The students list sits below, with a Remove button next to each name.

When you are done, tap **“Save draft”**. Your changes are saved as a draft — children still see the approved quizzes. When you are happy with everything, tap **“Upload for approval”**. Yently approves it and your changes go live. You will get an email once they are live.

5. Add your topics and questions

In the Setup tab, under **Topics**, tap **“+ Add topic”**. A card appears for the topic. Fill it in:

- **Topic name** — for example Animals, or a topic of your own.
- **Facts — one per line** — shown as “Did you know?” when a child picks the topic.
- **Questions** — tap **“Add question”** and fill in the question, four choices, which choice is correct, the level (Easy, Medium or Hard), and the fun fact shown after the question.

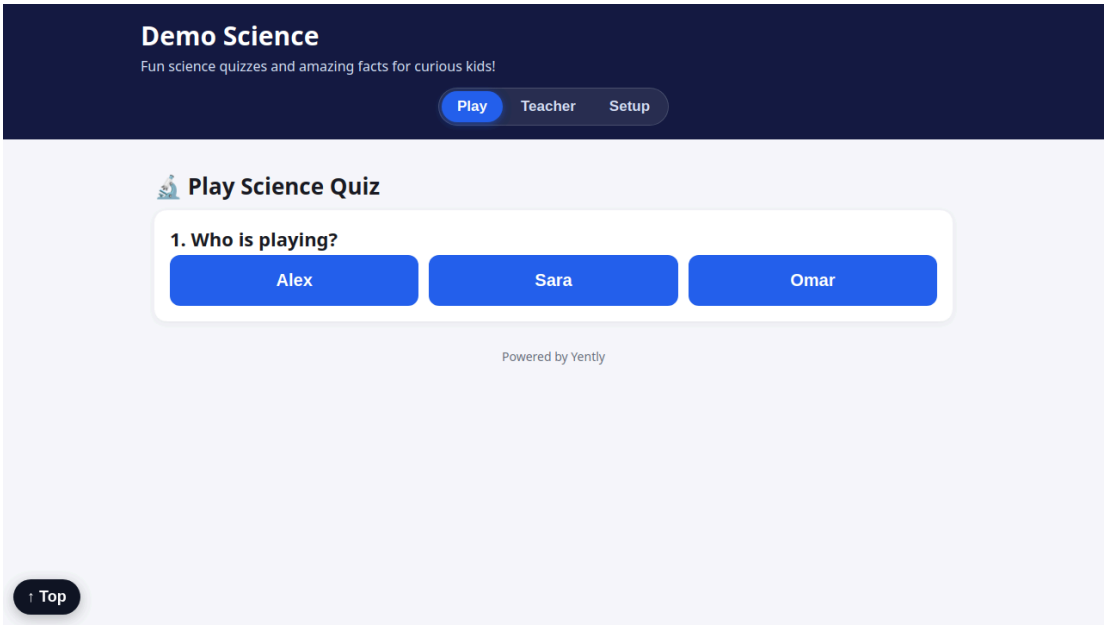

To remove a question, tap **“Remove question”** and confirm with **“Yes, remove”**. To remove a whole topic, tap **“Remove topic”** and confirm the same way. When the topics are done, tap **“Save draft”**, then **“Upload for approval”**. Yently approves them and your new quizzes go live.

Change a question or add a topic any time, the same way: edit it in Setup, save the draft, upload for approval.

6. Your school page — what the children see

Your school name and about text sit at the top of the page. Below them are the three tabs: **Play, Teacher, Setup**.

Play is open to everyone with the link — no password, no login. A child picks their name, then a topic, then a level, and the quiz begins. A link with no school in it shows “School not found” — only people you share your private link with can open your school page.

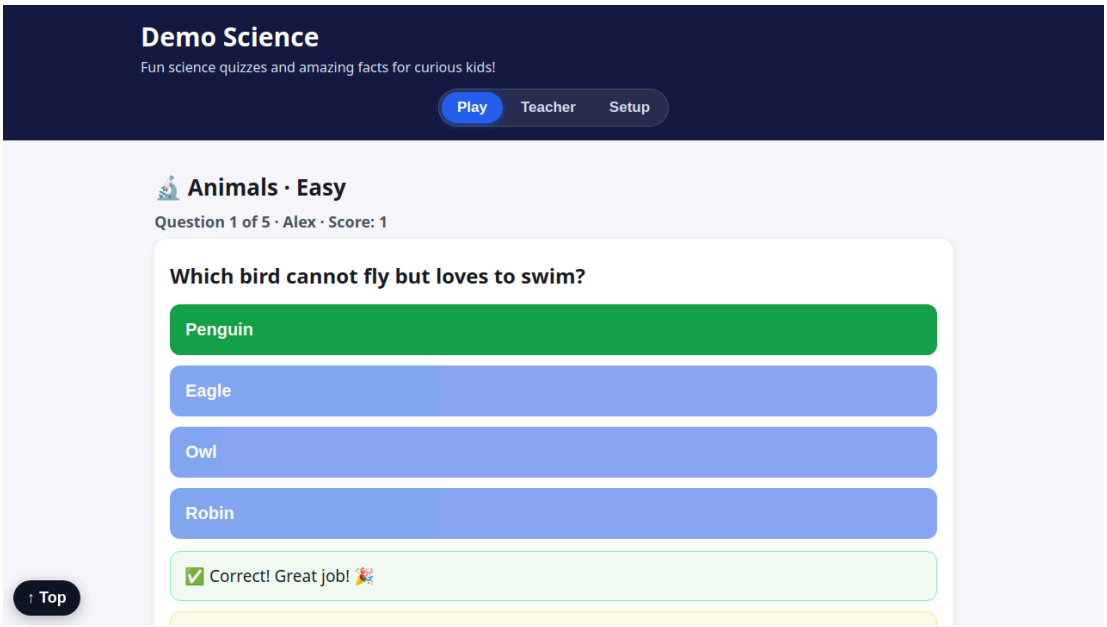

The Play tab. Step 1: who is playing? The demo school’s three students — Alex, Sara and Omar — each tap their own name.

7. Playing a quiz

A quiz takes five questions. It works like this:

1. Tap your **name**.
2. Tap a **topic** — Animals, Space, the Human Body, Plants, or Earth & Weather. A “Did you know?” fact from that topic appears.
3. Tap a **level** — Easy, Medium or Hard — then **“Start the quiz!”**.
4. Tap an answer for each question. Right answers turn green; a wrong answer shows the right one. Every answer brings a **fun fact**.
5. At the end, the **score** shows — for example 4 out of 5 — with a cheerful message, and the score is saved for the teacher. Tap **“Play again”** for a new round, or **“Change topic”** to pick another topic.

A quiz in the demo school. Animals, Easy — question 1 of 5, Alex playing. Penguin is green: the right answer, with “Correct! Great job!” underneath. The fun fact for the question appears below it.

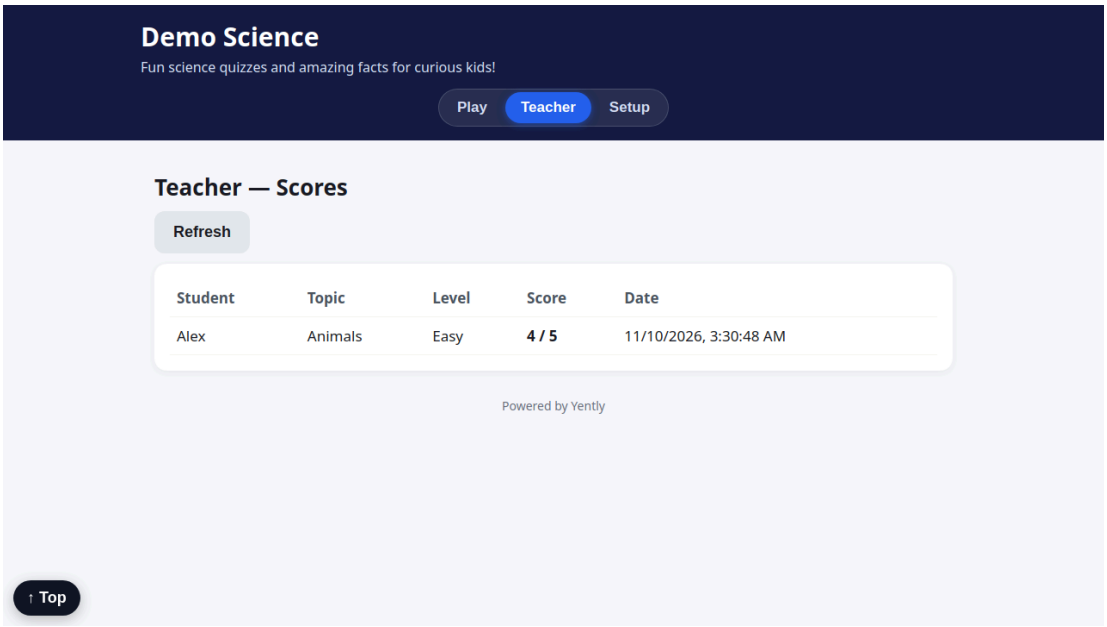

8. The Teacher area — every score

Tap the **“Teacher”** tab. Enter the teacher password and tap **“Unlock”**. (If your school has no teacher password set, the Teacher area opens straight away.)

Every finished quiz lands here, in a table with five columns:

- **Student** — who played.
- **Topic** and **Level** — what they played.
- **Score** — how they did, out of 5.
- **Date** — when they played.

Scores appear as soon as a child finishes a quiz. Tap **“Refresh”** to see the newest ones. If nobody has played yet, the page says: “No scores yet. Scores appear here after a student finishes a quiz in Play.”

The Teacher area in the demo school. Alex scored 4 out of 5 in Animals, Easy. Every finished quiz lands here, with the date it was played.

9. The teacher password

One shared password unlocks the **Teacher** area. Every teacher uses the same one, on any phone or computer.

The password is **set by Yently** and comes with your setup email. There is no place in Setup to change it yourself — if you want it changed, ask Yently and they will change it for you.

The password is never saved on the phone. If the page is reloaded, the teacher enters it again. Tell your teachers the password, and ask Yently to change it if someone leaves.

If your school has no teacher password set, the Teacher area stays open and anyone with the link can see the scores. Yently sets a password for you, so this does not happen by accident.

10. Add-ons — make it yours for a little more

Each add-on is added the same way as the Science page — from its own page, into the same cart:

- **Clean Link — $2/month.** Your own short link, yently.com/your-name, instead of the long one. Easier to print on a poster, a card or a window.
- **TV Gallery — $2/month.** Your pictures on the big screen — a slideshow on the TV in your classroom.
- **Live Chat — $3/month.** Chat with visitors right on your page.

> **Bundle & save:** 2 plans 10% off, 3 plans 15% off, 4 or more plans 20% off. Your saving is applied automatically, no code needed. Kids subjects count like any other plan.

11. Prices at a glance

Plan	Price	First month
Kids Science page	$10/month	Free
Clean Link	$2/month	Free
TV Gallery	$2/month	Free
Live Chat	$3/month	Free

Bundle: 2 plans 10% off, 3 plans 15% off, 4 or more plans 20% off — applied automatically. No setup fee.

All nine Kids subjects together are $90/month at list price — $72/month with the 20% bundle saving.

12. Why Yently

Yently is **$10 a month**, first month free, no setup fee.

Yently builds it, hosts it, and keeps it running. You just use it. Add another subject any time, and add an add-on when you want more, for a few dollars a month.

Cancel any time.

13. Need help?

Use the **“Get your Kids Science page”** form on the Science page: fill in your name, school name, email and phone, write your question in the message box, and tap **“Send request”**. Yently will be in touch to set up your Kids Science page.

> **Your first quiz, in short:** buy it on yently.com → get your link and login by email → log in to Setup → add your students and topics → upload for approval → share the link, and the children start playing.

Thank you for choosing Yently. Your school page is ready when you are — and Yently is one message away if you need a hand.
